

### FIELD OF USE

This kit is especially designed for rescue interventions with electrical risk.

### COMPONENTS

- Wall mounted board with a clear door and some straps to fix the below components :
  - 1 insulating platform 40 kV (phase/ground).CT-7-40/1
  - 1 pair of insulating gloves 36 kV, class 4 of IEC standard. CG-40-C
  - 1 telescopic stick 45 kV with rescue hook. CS-45
  - 1 voltage detector CL-4-03 (3 to 40kv) with flexible contact antenna fixed on the hook.
  - 1 pair of insulating boots to protect against the electrical risks of voltage when stepping on the ground. MV-137/45 (size 45).
  - 1 cable cutter with insulated handles. CZ-60
  - 1 talcum powder can.M952120
- Safety instructions on the plastic board.
- 1 instruction manual.
- 1 fixing kit with :
  - 2 braces,
  - 6 TR 6x35 screws,
  - 6 pins,
  - 6 washers,
  - 2 plastic clips.

### CHARACTERISTICS

- The components are within the plastic board which :
  - Protects against dust and shocks.
  - Avoids borrowing of the components.
  - Protects the equipment during transportation.
- The kit is delivered with all the components already inside the board.
- When the kit is fixed on the wall, the voltage detector shall be fixed on the stick, and the stick shall be unfolded and placed in the board.
- Dimensions: 0,84 m x 0,75 m x 0,27 m.
- Weight with components : 21 kg.
